

MVP HOMEBOUND PROGRAM

EDUCATION FOR STUDENTS UNABLE TO
PHYSICALLY ATTEND SCHOOL

Hospitalized and homebound students face multiple challenges when it comes to continuing their education program. Short-term injury and illness do not need to impact student progress, grade advancement, or graduation.

Montgomery Virtual Program (MVP) helps families and districts by ensuring that homebound students continue to receive the highest quality education possible. Through MVP, students in grades 6-12 are able to access a comprehensive catalog of PA standards-aligned courses that are taught by highly-qualified state-certified teachers. Our customized and flexible approach to learning engages students and offers additional layers of support that take into account IEP and 504 accommodations. MVP strives to provide families and districts a cost-effective solution while maintaining student progress at a pace that keeps them on track.
